## **SELEX Galileo shows new technology and ideas at the Innovation Awards 2010**

Last week, the winners of SELEX Galileo's Innovation Awards received their prizes. Teams from the Company received a number of awards for brand new technologies and ideas designed to meet the emerging requirements of customer around the world and most of all to help and protect troops on the front lines..

The event was attended by SELEX Galileo's President Remo Pertica and CEO Fabrizio Giulianini, as well as representatives from the winning teams and winners of the "Galileo Galilei" prize for patent applications.

Fabrizio Giulianini emphasised the importance of patents as concrete indicators of technological advances. SELEX Galileo invests around 15% of its revenues into research and development, and its business is driven by being at the forefront of technology.

The winning projects spanned the breadth of SELEX Galileo's technologies, with proposals that included new ideas in electro-optical sensors, lasers, unmanned autonomous systems, radar, systems for monitoring territory and three dimensional image generation systems.
