

## FAST TRACK CELL PROVIDES RAPID RESPONSE

The specialist Fast Track machining cell provides rapid response to support activities from initial conception to full released drawings.

We can reduce your time to market on pre-production parts through the manufacture of dummy space models and prototypes using a variety of machines, processes and materials. The Fast Track Cell is fully supported with Computer Aided Design (CAD) capability for tooling design, and Tool Room for the manufacture of jigs, fixtures and tooling.

### COMPETITIVE PRICING

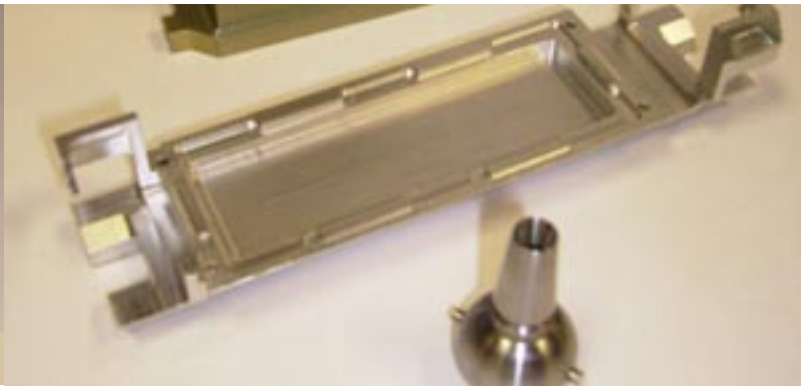

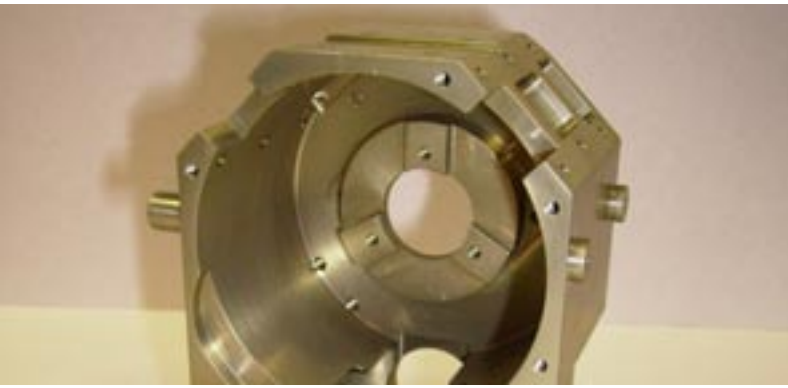

Our experienced and trained staff provide quotations and deliveries with competitive pricing to suit individual customer requirements.

### RAPID PROTOTYPING

As part of our continuous improvement programme, we have introduced a Rapid Prototyping machine which has the capability to produce fully cured 3D models in acrylic-based resins and provides a number of benefits:

- Reduced design iterations
- Design for manufacture
- Securing new business
- Functionality testing, assembly trials and final design verification.

Comprehensive engineering and manufacturing service from experienced staff

**KEY BENEFITS**

- Reduced time to market on pre-production parts
- Manufacture of prototypes and demonstrators
- Dummy space models/mass models
- Personal service from experienced staff
- Full CAD capability for tooling design
- Any material, including plastic
- Tool Room for design, manufacture and repair of jigs, fixtures and tooling
- Complete assembly, chemical processing and painting service.
